### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/10/05 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 13-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kay in view of Freeman et al. (US 6,068,183) (hereinafter referred to as 'Freeman').

Kay teaches a method for electronic ticket recognition and acceptance for a ticketed event comprising the steps of:

facilitating purchasing of an electronic ticket from a networked ticketing computer (col. 3, lines 26-33);

downloading the electronic ticket to a portable computing device (paper) having a display output (paper surface) (col. 4, lines 29-31); and

Art Unit: 2876

accepting the electronic ticket by optical communication between the display and a ticket receiving unit (portable scanner/terminal 27).

Kay lacks the specific teaching of providing amenities to a ticket user.

Freeman teaches a method for electronic ticket recognition and acceptance at a ticketed event comprising a step of:

providing amenities;

the method wherein the step of providing amenities further comprises the step of providing a discount for concession items available at the ticketed event via a ticket receiving unit;

the method wherein the step of providing amenities further comprises the step of providing an event map via remote communication wherein the electronic ticket allows the event map to be downloaded and activated;

the method wherein the step of providing amenities further comprises the step of providing direction to a person's seat at the ticketed event using the electronic ticket;

the method wherein the step of providing amenities further comprises the step of providing directions to a person's seat at the ticketed event based on a location of a ticket receiving unit where the person entered the ticketed event;

the method wherein the step of providing amenities further comprises the step of providing an electronic event program via remote communication, wherein the electronic ticket allows the electronic event program to be downloaded and viewed; and

Art Unit: 2876

the method wherein the step of providing amenities further comprises the step of providing a map that is customizable based on the electronic ticket (col. 2, lines 30-32 and col. 5, lines 53-65).

One of ordinary skill in the art would have readily recognized that giving a ticket holder access to particular services or entrances would have been beneficial to the invention of Kay for giving ticket holders a variety of perks that come with the purchase of a ticket, thus possibly encouraging future ticket purchases for that particular event. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Kay with the aforementioned teachings of Freeman to ensure future financial gains on behalf of that event.

#### ***Response to Arguments***

4. Applicant's arguments, filed 2/10/05, with respect to the rejection(s) of claim(s) 13-19 under 35 U.S.C. 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Kay in view of Freeman.
